

ED Poland
by Mariusz Orlikowski

On June 27th, 2009, Łódź, Poland took place a joint meeting of Poland Section of IEEE ED Chapter and Section of Microelectronics of Committee of Electronics and Telecommunication of Polish Academy of Science. The meeting started with the presentation of Dr. Piotr Grabciec (Warsaw University of Technology, Poland) "*An Idea of National Research Center for Micro- and Nanoelectronics Technology*". The idea of creation non-commercial IC fabrication center as a support for research and education in Poland was later discussed. As examples of similar centers existing in USA and Switzerland were presented by Dr. Marek Turowski (CFD Research Corporation, USA) and Dr. Władysław Grabński (GMC, Switzerland). As a conclusion the most important steps for the nearest future were identified.
